	UAB NORDETANOLIS	RENEWABLE ENERGY TECHNOLOGIES
	<p>The company is planning to set up the biofuel (wood) production project involving a supply base in Belarus and also the processing base in Lithuania. The technology base could be more than simple drying; The company is looking for the breakthrough technologies such as torrefaction or sugar recovery from biomass.</p> <p>The company is looking for Norwegian partners with know-how in these fields.</p> <p><i>Contact: Mr. Ugnius Strauka, +370 676 34 558</i></p>	
	UAB DOLETA	RECYCLING AND WASTE REDUCTION
	<p>The company is a manufacturer of windows and doors in Lithuania and Europe. It is highly acknowledged for its wood and wood-aluminium, wood-glass windows, doors, facades, winter gardens, and conservatories.</p> <p>The company hopes to exchange its knowledge and useful information with Norwegian partners on the effective and responsible use of natural resources, the development of new environmental technologies and the development or introduction of those technologies to the market. It expects to get information about the importance of reduction of the negative impact on the environment and human health.</p> <p><i>Contact: Mr. Mindaugas Skardžius +370 698 37 095</i></p>	
	UAB EMIX COMPOSITES	COMPOSITE PRODUCTION
	<p>The company has a strong experience in composite production from GRP and Carbon fibre. The main activities include boat building, new design development, hull and superstructure building, as well as complete boat outfitting. It has an experience in working in one of the Scandinavian ship yard as a subcontractor for building passenger fast ferries from carbon fibre for the Norwegian market.</p> <p>The company is looking for Norwegian partners who work in composite boat building field for cooperation in boat building. The company could be interested in finding partners for wind mill blades production from composite materials.</p> <p><i>Contact: Mr. Andrius Liegis +370 604 02 700</i></p>	

UAB AUTOBAGI	CIVILIAN, SPECIAL AND COMMERCIAL TRANSPORT PRODUCTION
	<p>The company is specialising in civilian, special and commercial transport production. It is an official representative of the following companies: KAMAZ, PM-GROUP (hydraulic cranes), DHOLLANDIA (hydraulic tail lifts-platforms), DFM Mini Auto Chinese vehicles.</p> <p>The company is looking for Norwegian partners who work in eco-friendly transport, e.g. eco-vehicles, green environment dye technology, the use of bio-fuel and other fields. It is interested in all new technologies that refer to eco-friendly production of transport.</p> <p><i>Contact: Mr. Giedrius Diktanas +370 687 47 498</i></p>
UAB COFFEE CHERRY	COFFEE BEANS ROASTING
	<p>The company mainly focuses on exclusive coffee roasting and coffee equipment sales. Its mission is to apply the best roasting technologies, produce the best coffee beans in the region, be able to make unique coffee blends or single origin coffee, packaging, branding and labelling for each customer.</p> <p>The company is looking for the retail and B2B partners in the FMCG sector. The company is interested in improving the range and quality of their producing and packing products.</p> <p><i>Contact: Mr. Žygis Markevičius, +370 652 11 195</i></p>
UAB PROGRAMINIS KODAS	ICT
	<p>The company is developing tailor-made web projects. IT consulting services are part of the company's activities. It is planning to create E-green food project - online platform for aquaculture farmers, farmers and its customers, helping find fresh fish, vegetables and green food in the most efficient way.</p> <p>The company is looking for Norwegian partner: green consulting, green ICT company or research institution which could consult on how to use the up to date most efficient green ICT solutions.</p> <p><i>Contact: Mr. Simonas Žunda +370 659 59 569</i></p>

	UAB KARBONAS	ENGINEERING INDUSTRY
	<p>The company is working in the field of sheet profile processing services - laser, plasma, gas, water-jet cutting, bending, drilling, welding - TIG, MIG, MAG, 3D scanning, measuring. CNC milling with 5 sides milling machine OKUMA MCR-A5C. It offers production service for green industry, heavy/light industry, architecture/construction industry, energy, medicine, agriculture, food industry, mining, transportation, etc.</p> <p>The company is looking for Norwegian partners who are familiar with the "green" technology of eco-friendly metal surface coating/surface treatment.</p> <p><i>Contact: Mr. Mindaugas Mozuras, +370 686 54 489</i></p>	
	UAB GILĖS INŽINERIJA	ENERGY EFFICIENT
	<p>The company produces the equipment for the automatisisation of heating boilers for renewable fuel types (wood, straw, biomass, etc.). The company also performs research for new types of renewable fuel.</p> <p>The company is looking for Norwegian partners who work in the field of research of renewable energy for the industry or supply, also for partners who work with utilisation, or the installers of boilers and boiler makers.</p> <p><i>Contact: Mr. Darius Šauklys +370 611 19 158</i></p>	
	UAB KOMUNALINIŲ ĮMONIŲ KOMBINATAS	RECYCLING AND WASTE REDUCTION
	<p>The company is collecting household waste and sorting secondary raw materials (glass, paper, plastic and other packaging) from separate collection stream. It is also working with a number of companies that have postproductional waste.</p> <p>The company is looking for Norwegian partners to supply materials to be recycled; The technological partner capable of supplying equipment or know-how is also needed.</p> <p><i>Contact: Mr. Albinas Zakarauskas +370 652 88 874</i></p>	

	UAB ECO-FRIENDLY BOTTLE	RECYCLING AND WASTE REDUCTION
	<p>The company is manufacturing reusable collapsible plastic bottles. The bottles can be shrunk and contracted by hand. They are reusable, appealing, nature-friendly, economical, compact, convenient, BPA free and recyclable. The volume of this bottle may be reduced by more than 9 times, when it is compress by hand.</p> <p>The company is looking for Norwegian partners, who are working in vending machine business to create, build and maintain a network of innovative vending machines - micro water factories (water filling stations) that will fill fresh and filtrated drinking water into our collapsible eco-friendly bottles. The company is looking for marketing professionals to market the vending machine network and collapsible eco-friendly bottle.</p> <p style="text-align: right;"><i>Contact: Mr. Laurynas Benetis +370 683 45 264</i></p>	
	UAB LITBONA	RECYCLING AND WASTE REDUCTION
	<p>The company is working with commercial building energy audit and offers non-standard solutions for saving energy in production processes. The rea re plans to start a fish farm (RAS) with low energy requirements. The main aim is to create productive recycling line for fish processes waste and generate high biological value products (fish food, enzyme, gelatin).</p> <p>The company is looking for Norwegian partners who work in fish farming, fish processes industry, fish waste recycling and food waste reduction area.</p> <p style="text-align: right;"><i>Contact: Mr. Aurimas Bieliauskas +370 656 27 718</i></p>	
	UAB EVERI	ALTERNATIVE ENERGY PRODUCTION
	<p>The company is engaged in production of renewable electric energy. It invests in the alternative energy projects. The company has an experience in solar energy power plans management. It is looking for new investment opportunities in all the fields of alternative energy.</p> <p>The company is looking for Norwegian partners who can offer new efficient equipment for energy production including full know-how for its installation and maintenance.</p> <p style="text-align: right;"><i>Contact: Mr. Jeffrey Kindsman +371 253 49 745</i></p>	

UAB BALTENA	ENERGY EFFICIENCY/RENEWABLE TECHNOLOGIES
<b>BALTENA</b> 	<p>The company is dealing with energy efficient installations in public and residential buildings (including renewable energy technologies). It is providing consultancy and assistance to the municipalities in the energy planning, investment appraisal, feasibility studies, and personnel trainings. The company is involved in R&amp;D. It is promoting new technologies and innovative technical design.</p> <p>The company is looking for Norwegian partners who is interested in energy sustainable buildings and wider use of renewable energies like aero-thermal, geo-thermal or solar and is curious about new technical solutions.</p> <p><i>Contact: Mr. Rimantas Zabarauskas +370 676 38 345</i></p>
	<p>The company is focusing on recycling chicken manure and turn it into the high value added products.</p> <p>The company is looking for Norwegian partners who could be either interested in utilizing their existing quantities of chicken manure to produce bio-fertilizer or using bio fertilizer to develop other marketable products. Such products could vary: plant specific fertilizers, various soil amendments etc.</p> <p><i>Contact: Mr. Mindaugas Sinickas +370 603 32 455</i></p>
