

**AGREED RECORD ON THE SHARING OF NORWEGIAN SPRING-SPAWNING HERRING
BETWEEN THE COASTAL STATES THE FAROE ISLANDS AND NORWAY**

13th December 2024

A delegation from the Faroe Islands headed by Herluf Sigvaldsson and a delegation from Norway headed by Elisabeth Norgård Gabrielsen met in Oslo to consult on the future sharing of Norwegian spring-spawning herring. This meeting followed a number of previous meetings on the sharing issue.

The Heads of Delegations agreed that the future sharing of the total allowable catch (TAC) should be as follows and to recommend this to their authorities:

The Faroe Islands	10.00%
Norway	64.18%
Unallocated	25.82%

Any Party may opt out of this sharing arrangement by giving a notification to the other Party, preferably before 1 October and containing an explanation of why the Party has chosen to opt out of the arrangement.

The Party opting out should set their national quota of Norwegian spring-spawning herring according to this sharing arrangement until at least the end of the next year after a notification is submitted.

The parties can mutually decide on different arrangements.
