Comment from NBN: The document is not suitable for peer assessment of accreditation bodies. We propose:

- to be revised regarding the requirements for peer assessment of accreditation bodies
- or to be revised by deleting the accreditation bodies of the scope of the standard

Comment from NBN: The suitability of this standard for New legal framework (decision 768/2008/EU) should have to be checked; if this standard should be used to write the technical documentation as required by the decision, then article 5 is not detailed enough (even art 5.2 foresees "other relevant information" to be included).
