

MATERIAL																	
Field of investm	Field of activity	Project No.	Project name	Background and overall objectives	Scope	Cost estimate	2026	2027	2028	2029	2030	2031	2032	2033			
Materiel	Support	P1196	Ammunition for main battle tanks and tanks	The purpose of the project is to procure ammunition for main battle tanks and tanks.		Less than NOK 1 billion											
Materiel	Support	LTP MATR 006	Increased endurance BDM	Supply readiness – Ammunition for improved endurance on land systems.		More than NOK 1 billion											
Materiel	Support	LTP MATR 008	Supply readiness – stockpiling inventories		All classes of supply	More than NOK 1 billion											
Materiel	Support	LTP MATR 115	Observation equipment		Night vision equipment. Placeholder for expected renewal needs over time.	More than NOK 1 billion											
Materiel	Support	LTP MATR 004	Supply readiness – 76mm OTO-MELARA		Increase ammunition stocks.	Less than NOK 1 billion											
Materiel	Maritime	P6096	Frigate service life extension	The project shall update the Norwegian Navy's Fridtjof Nansen-class frigates to ensure they maintain adequate performance throughout the remainder of their service lives.	The project shall include replacing subsystems as needed due to obsolescence, as well as necessary upgrades to sustain the frigate structure's operational capability throughout its service life.	More than NOK 5 billion											
Materiel	Maritime	P6380	Upgrade – Norwegian Coastal Ranger Command (KJK)	The project shall procure the necessary materiel for the Norwegian Coastal Ranger Command (KJK) to maintain the unit's operational capability and to facilitate approved further development.	The project shall comprise a large number of items in limited quantities, adapted to the needs and specific characteristics of the Norwegian Coastal Ranger Command (KJK). This includes replacement of current boat capabilities, UAV systems of various sizes, weapons, sensors, and command, control, and information systems (C2IS) equipment. The measure includes some facilities/infrastructure (EBA) in Trondenes and Ramsund.	Between NOK 1-5 billion											
Materiel	Maritime	P6395	Capability for electromagnetic signature measurement for UVB	The project shall provide a relevant measurement station to maintain electromagnetic signature measurement capacity for the Ula class and the new submarines.	The project includes the procurement of new materiel systems and is closely linked to the associated facilities/infrastructure (EBA) project.	Less than NOK 1 billion											
Materiel	Maritime	P6624	Continuation of Norwegian Inner Coast Guard	The project shall update and upgrade the Nornen-class coastguard vessels to maintain adequate operational performance throughout the remainder of their service lives.	The project shall include replacing subsystems as needed due to obsolescence, as well as necessary upgrades to sustain the vessels' operational capability throughout their service life. The project also includes replacement of the vessels' fast patrol boats (FPB)	Less than NOK 1 billion											
Materiel	Maritime	P1118	Standardised vessels for the Norwegian Navy	The project shall add new vessels to replace the current coastguard and support vessels.	A class of standardised vessels. The project is in the early investigation phase, and the concept has not been decided.	More than NOK 5 billion											
Materiel	Maritime	LTP MATR 053	Lightweight torpedo service life extension		Extend the service life of the current lightweight torpedo	More than NOK 1 billion											
Materiel	Maritime	LTP MATR 054	Lightweight torpedo – new procurement		Acquire new lightweight torpedo capability	More than NOK 1 billion											
Materiel	Maritime	LTP MATR 070	ASW Helicopter for new frigate			More than NOK 1 billion											
Materiel	Maritime	P1181	Continuation of the Norwegian Naval EOD Command		Continue and further develop the Norwegian Naval EOD Command's capability through the renewal of the materiel park.	Less than NOK 1 billion											
Materiel	Maritime	LTP MATR 002	Tactical intelligence and analysis support			Less than NOK 1 billion											
Materiel	Air	P7639	Strengthening of combat air defence capability	Strengthen the Norwegian Army's combat air defence.	Integration between MRAD and SHORAD, as well as expanding the scope.	Between NOK 1-5 billion											
Materiel	Air	P1107	New helicopter capability for the Norwegian Armed Forces	The purpose of the project is to procure new helicopter capability better suited to the special forces and to increase the Norwegian Army's helicopter transport capacity.	Procure a number of helicopters adapted to special operations and transport missions, respectively.	More than NOK 5 billion											
Materiel	Air	P1108	Air logistics base	The purpose of the project is to strengthen the Air Force Logistics Base's capacity to support deployed units outside home bases by acquiring support and command-and-control materiel.	Be able to support, e.g., the Norwegian Air Force's deployed force contributions with medium or small contributions.	Less than NOK 1 billion											
Materiel	Air	P1117	Base defence Ørland, Evenes, Rygge, Bfoss	The purpose of the project is to procure base defence materiel for the air stations that contribute to the development of base defence through structural development, using uniform solutions.	Procure base defence materiel for Ørland, Evenes, Rygge, and Bardufoss air stations.	Less than NOK 1 billion											
Materiel	Air	P2048	Upgrade – P8	The purpose of the project is to maintain and further develop P-8 to ensure operational capability and meet current security policy threats.	Procurement of necessary and available upgrade packages, as well as participation in relevant co-operation forums.	Between NOK 1-5 billion											
Materiel	Air	P7621	Ground-based air defence	The purpose of the project is to strengthen ground-based air defence in the Norwegian Armed Forces.	Upgrade existing NASAMS system, sensors, and effectors, as well as integration with national and NATO C2.	More than NOK 5 billion											

[illegible]

Materiel	ICT	P1200	Modernisation of FIF		Modernisation of Enterprise Resource Planning (ERP) – core	More than NOK 1 billion										
Materiel	ICT	P1199	The Norwegian Armed Forces’ secure platforms	Modernisation of the Norwegian Armed Forces’ Secure Platforms (the ICT materiel component of the Concept Selection Study for the Norwegian Armed Forces Secure Platforms (KVU FSP)).		More than NOK 1 billion										
Materiel	ICT	LTP MATR 068	Strengthen defensive cyber capability			Less than NOK 1 billion										
Materiel	ICT	LTP MATR 106	Increased capacity in the space and ground segments – SATCOM		Satellite constellation communication, narrowband – TACSAT, and Continuation and replacement of WGS. Including a SATCOM anchor station.	More than NOK 1 billion										

Facilities/Infrastructure																
Field of investm	Region	Location	Field of activity	Project No.	Project name	Background and overall	Scope	Cost estim	2026	2027	2028	2029	2030	2031	2032	2033
Facilities/Infrastructure (EBA)	Troms County	Bardufoss	Norwegian Army			Development – housing, accommodation, and offices		More than NOK 500 million								
Facilities/Infrastructure (EBA)	Troms County	Setermoen	Norwegian Army	2SF10567 and 2LV10501	EBA for long-range precision fires and combat air defence	Acquire facilities/infrastructure (EBA) to support materiel procurement	Establishment of storage and maintenance facilities.	More than NOK 500 million								
Facilities/Infrastructure (EBA)	Troms County	Setermoen	Norwegian Army	LTP EBA 037	Simulator – K9 Artillery System	Acquire facilities/infrastructure (EBA) to support materiel procurement	Establishment of simulator facilities for training and education.	Less than NOK 500 million								
Facilities/Infrastructure (EBA)	Troms County	Skjold	Norwegian Army	LTP EBA 033	Development – EBA Skjold Phase 1	Development – housing, accommodation, and offices	Establishment of accommodation capacity for serving NCOs and enlisted personnel, as well as office facilities.	More than NOK 500 million								
Facilities/Infrastructure (EBA)	Troms County	Skjold	Norwegian Army	2LV10576 and 2LV10539	Supply point, vehicle wash facility, and multi-purpose hall – Skjold	Acquire facilities/infrastructure (EBA) to support materiel procurement	Establishment of multi-purpose hall, supply point and vehicle wash facility	Less than NOK 500 million								
Facilities/Infrastructure (EBA)	Nationwide	Additional locations	Norwegian Army	2LV10564	Facilities/Infrastructure (EBA) for new tanks	Acquire facilities/infrastructure (EBA) to support materiel procurement	Renewal and establishment of storage and maintenance facilities.	More than NOK 500 million								
Facilities/Infrastructure (EBA)	Nationwide	Additional locations	Norwegian Navy	LTP EBA 001	Facilities/Infrastructure (EBA) for standardised vessel class	Acquire facilities/infrastructure (EBA) to support materiel procurement	Establishment and renewal of facilities/infrastructure (EBA).	More than NOK 500 million								
Facilities/Infrastructure (EBA)	Rogaland County	Madla	Norwegian Navy	2UØ20348 and LTP EBA 044	Strengthen recruit training	Safeguard the Norwegian Armed Forces’ training capacity to maintain a sufficiently stable and operational capability.	Establishment and renewal of facilities/infrastructure (EBA).	More than NOK 500 million								

Facilities/Infrastructure (EBA)	Rogaland County	Madla	Norwegian Navy	2UØ20348 and LTP EBA 044	Strengthen recruit training	Safeguard the Norwegian Armed Forces’ training capacity to maintain a sufficiently stable and operational capability.	Establishment and renewal of facilities/infrastructure (EBA).	More than NOK 500 million												
Facilities/Infrastructure (EBA)	Vestland County	Haakonsvern	Norwegian Navy	LTP EBA 005	Facilities/Infrastructure (EBA) – Ocean-going frigate	Acquire facilities/infrastructure (EBA) to support materiel procurement	Renewal and establishment of infrastructure and facilities.	More than NOK 500 million												
Facilities/Infrastructure (EBA)	Vestland County	Haakonsvern	Norwegian Navy	Multiple	Development of facilities/infrastructure (EBA) – Haakonsvern	Acquire facilities/infrastructure (EBA) to support materiel procurement	Establishment of infrastructure, backup power, and access/arrival facilities.	More than NOK 500 million												
Facilities/Infrastructure (EBA)	Troms County	Ramsund	Norwegian Navy	2BS20335	Further development Ramsund	Development of the entire Ramsund maritime base.	Establishment and renewal of facilities/infrastructure (EBA).	More than NOK 500 million												
Facilities/Infrastructure (EBA)	Nationwide	Additional locations	Norwegian Air Force	2BS30478	Air Operational facilities/infrastructure (EBA)	Develop air bases at Bardufoss, Rugge, and Ørland to support materiel procurement.	Establishment and renewal of Facilities/Infrastructure (EBA).	More than NOK 500 million												
Facilities/Infrastructure (EBA)	Nordland County	Evenes	Norwegian Air Force	LTP EBA 090 and LTP EBA 002	Development of air base	Facilities/Infrastructure (EBA) for P-8 simulator, housing and accommodation	Establishment and renewal of facilities/infrastructure (EBA).	More than NOK 500 million												
Facilities/Infrastructure (EBA)	Trøndelag County	Ørlandet	Norwegian Air Force	Multiple	Development of air base	Replacement and co-location of the maintenance group, as well as the establishment and further development of NCO accommodation, offices, and enlisted accommodation.	Establishment and renewal of facilities/infrastructure (EBA).	More than NOK 500 million												
Facilities/Infrastructure (EBA)	Nationwide	Additional locations	ICT	2AP70284	Data centre for the Norwegian Armed Forces’ secure platforms	Establishment of	Establishment and renewal of facilities/infrastructure (EBA).	More than NOK 500 million
