

Appendix 7

Template for Relevant Experience

1. Information on submission to Qualification Requirement D Experience, cf. Section 3 in Appendix 3

The applicant shall respond to Qualification Requirement D Experience in the tables below:

Table 7.1.1: Commissioned Reference Project - Offshore Wind

Description	Response
Name of the offshore wind project:	
Country:	
Name of developer(s):	
Commissioned project capacity (MW):	
Technology (fixed-bottom or floating):	
Ownership in previous and current project phases (%):	Development:
	Installation:
	In operation:
Milestone requirement with associated date:	
Contact authority:	
Detailed description of the project, including a description of the main elements of the project and the applicant's role and contribution (maximum 300 words):	

Tabell 7.1.2: Commissioned Reference Project - Grid Connection

Description	Response
Name of the project:	
Country:	

Unofficial English translation

Name of developer(s):	
Voltage level:	
Detailed description of the project:	
Ownership in previous and current project phases (%):	Development:
	Installation:
	In operation:
Milestone requirement with associated date:	
Contact authority:	
Detailed description of the project, including a description of the main elements of the project and the applicant's role and contribution (maximum 300 words):	

The requirement shall be addressed with a maximum of two reference projects, one for offshore wind and one for grid connection. The applicant may also refer to a single project if it encompasses both offshore wind and grid connection as described in Qualification Requirement D Experience in Appendix 3, Section 3

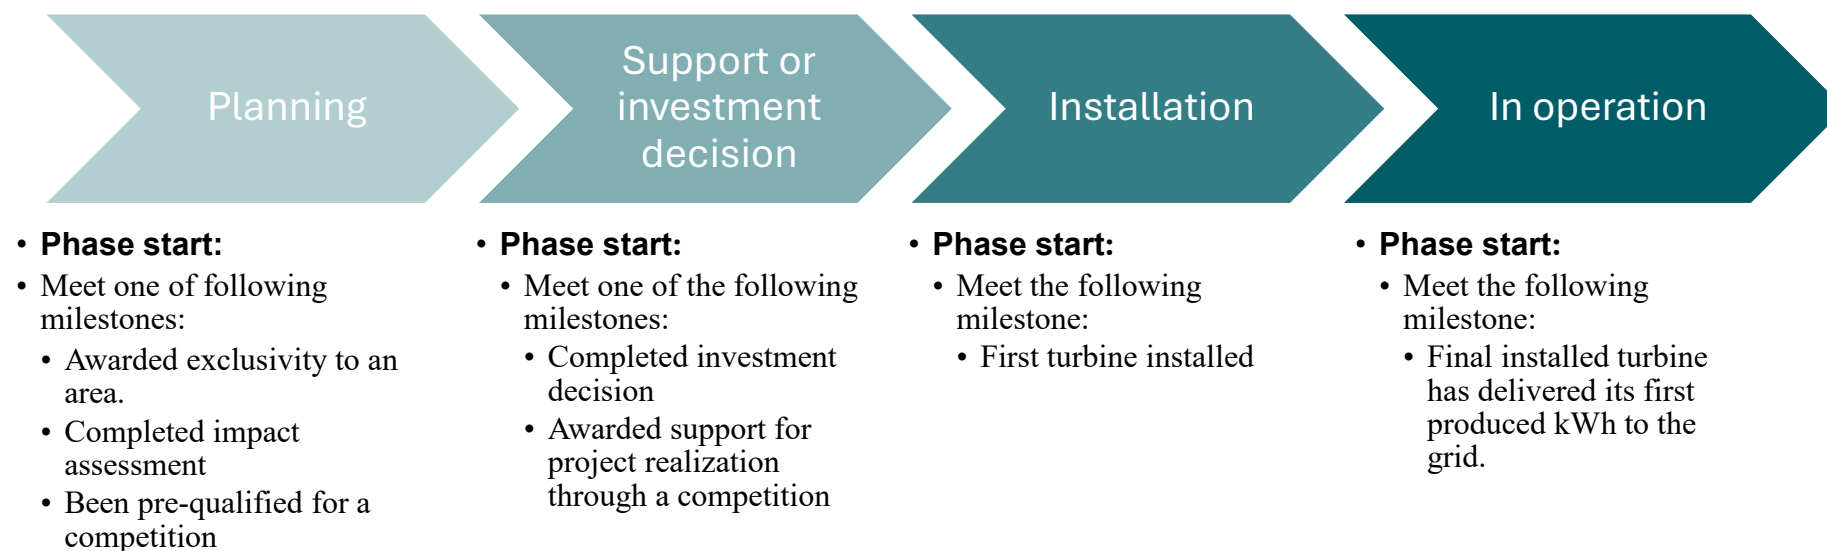

2. Information on submission to Qualitative Criterion 3B Relevant Experience

The applicant shall provide information about selected reference projects in the relevant tables below. The applicant may include up to 15 reference projects. Each reference project may only be included once.

To include a reference project, the applicant must have had at least 20% ownership during the selected project phase. A prerequisite for being able to include a project phase for a reference project is that the applicant – for the relevant project phase – meets one of the associated milestones (hereinafter referred to as the ‘milestone requirement’).

Below, the different project phases are described with their associated milestone requirements. The milestone ~~requirements in the selected project phase cannot be older than 10 years from the application deadline.~~ requirement for the relevant project phase that the applicant wishes to specify must not be older than 10 years, calculated from the application deadline. For example, if the applicant wishes to include a reference project in the ‘Planning’ phase, one of the relevant milestone requirements for this phase must have been met within the last 10 years, calculated from the application deadline. Where the applicant has met the milestone requirement for the ‘In operation’ project phase within the last 10 years, project phases completed prior to the 10-year limit will nevertheless be taken into account."

Figure 1 Project Phase Groupings with Associated Milestones

Planning

Reference projects that only cover this phase will only be credited if the project pertains to floating offshore wind. In order to place a floating reference project in the "Planning" phase, the applicant must have met one of the following milestones for the relevant reference project:

- Awarded exclusivity to an area.
- Submitted a completed impact assessment to the authorities.
- Been prequalified for a competition.

Support or Investment Decision

To place a reference project in the "Support or Investment Decision" phase, the applicant must have either completed an investment decision or been awarded support for project realization in a support competition for the relevant reference project.

Installation

To place a reference project in the "Installation" phase, the first turbine must be installed at sea where the turbine will stand and produce power.

In Operation

To place a reference project in the "In Operation" phase, the last turbine must have delivered its first produced kWh to the grid.

Tables for Reference Projects:

If the applicant wishes to include additional reference projects, the relevant table must be copied and added below. If the applicant wishes to use the offshore wind project described in the response to the qualification requirement for experience, cf. Section 1 above, the applicant shall fill out this reference project again below. This project will then count as one of the maximum 15 reference projects evaluated under the qualitative criterion Relevant Experience.

Tabell 7.2.1: Reference projects

Description	Response
Name of the offshore wind project:	
Country:	
Name of developer(s):	
Project capacity (MW):	
Technology (fixed-bottom or floating):	
Ownership in project phases (%):	Planning:
	Support/investment decision
	Installation:
	In operation:
Milestone requirement with associated date:	
Contact authority:	
Detailed description of the project, including a description of the main elements of the project and the applicant's role and contribution (maximum 300 words):
