

Working Together for a Green, Competitive and Inclusive Europe

EUR 184.5 million has been allocated to a number of cooperation programmes with the Czech Republic under the EEA and Norway Grants. The programmes are designed to strengthen cooperation between Norway and the Czech Republic and assist the Czech Republic and contribute to social and economic development in the Czech Republic.

Research and education, the environment and climate change, and culture are key sectors. These are sectors where there are good prospects for success and both countries share an interest in cooperation. Priority will be given to civil society, the justice sector and cooperation regarding human rights issues and improving the situation for the Roma population.

Eight Norwegian government agencies are involved in implementing these programmes and are responsible for recruiting Norwegian project partners.

THE EEA AND NORWAY GRANTS

The EEA and Norway Grants are linked to the EEA Agreement. Under the EEA Agreement, Iceland, Liechtenstein and Norway are part of the EU internal market. The EEA Agreement sets out the common goal of working together to reduce social and economic disparities in Europe and strengthen cooperation between donor and beneficiary countries. For the period 2014-2021, Iceland, Liechtenstein and Norway have allocated EUR 2.8 billion to the EEA and Norway Grants for this purpose. Norway provides just under 98 % of this amount.

The EEA and Norway Grants are an important tool in the Norwegian Government's active European policy, which seeks to promote a green, competitive and inclusive Europe.
